## Relied Upon Software

For the following measures, InSync by Qualifacts uses [Secure Exchange Solutions](#) and the clinical exchange solution software and additional 3rd party partner for § 170.315(a)(15), § 170.315(b)(1), § 170.315(e)(1), § 170.315(h)(1), and [Smile CDR Inc](#) for § 170.315 (g)(10).

## Real World Testing Plans

*"Real World Testing is an annual requirement outlined in the [ONC 21<sup>st</sup> Century Cures Act Final Rule](#) for all health IT developers participating in the ONC Health IT Certification Program. The purpose of this [Condition and Maintenance of Certification requirement](#) is for Certified Health IT Developers to demonstrate interoperability and functionality of their certified health IT in real world settings and scenarios rather than in a controlled test environment with an ONC-Authorized Testing Lab. Real World Testing verifies that deployed Certified Health IT continues to perform as intended by conducting and measuring observations of interoperability and data exchange. These observations are described in a public and transparent way through Real World Testing plans and reported as Real World Testing results."*
