

## ASAM Integration

Integrate ASAM into your practice through the Qualifacts InSync EHR platform.

### InSync + ASAM Partnership

The American Society of Addiction Medicine (ASAM) is committed to improving access to high-quality, evidence-based addiction prevention and treatment. To do this, ASAM has created valuable tools to help providers offer better care to those they serve.

Qualifacts InSync EHR platform now partners with ASAM to strengthen the assessment and referral process, support providers' clinical treatment planning, and more through either the ASAM CO-Triage® or the CONTINUUM® tools.

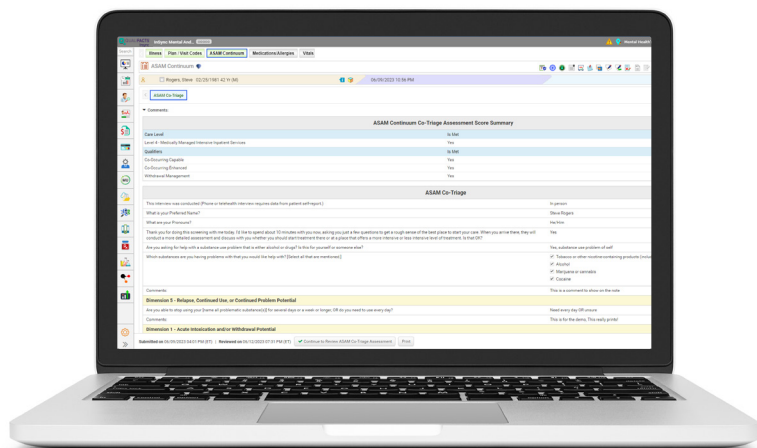

### POWERFUL, BI-DIRECTIONAL INTEGRATION FOR STREAMLINED CARE

With the click of a button in the Qualifacts InSync EHR dashboard, you can access the official ASAM CONTINUUM or CO-Triage assessment.

Patient information is then pushed to the ASAM tools where you follow the evidence-based, step-by-step interviewing guides to complete the assessment.

After the tools are completed in the ASAM platform, key elements such as responses, assessment scoring, and recommended levels of care are automatically placed into the patient's chart for reference.

## Offer Unique, Multidimensional Care for Your Substance Use Disorder (SUD) Community with ASAM

### CONTINUUM ASSESSMENT

- Increases patient treatment retention over time.
- Comprehensive biopsychosocial patient risk and needs assessment tool.
- Built-in clinical guidance and assistance.
- Supports collection of the 6 dimensions of care from ASAM criteria.
- Automated scoring.
- Proprietary algorithms for recommendations of level-of-care placement.
- Includes ASI, CIWA, and CINA scores for withdrawal.

**97%** Customer Satisfaction Rating

**75K+** Providers Served

**20+** Years in the Behavioral Health Market
