## Disclosure Attestation

**Disclaimer:** *This Health IT Module is compliant with the ONC Certification Criteria for Health IT and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.*

This Cost and Certification Disclosure is provided to document costs and additional information on the certified Qualifacs OnCall platform. This disclosure is posted publicly at <https://www.qualifacts.com/onc-certification-and-costs/> and on the ONC Certified HealthIT Product List (CHPL).

Qualifacs OnCall agrees to notify Drummond Group of any and all future changes to our transparency and disclosure language for this certified product version. Furthermore, OnCall understands and agrees that the ONC Health IT Certification Program Final Rule statement gives Drummond Group, as an ONC-ACB, the sole responsibility for ensuring compliance and determining appropriate consequences if EHR technology developers fail to divulge accurate transparency and disclosure information.

OnCall, in addition, understands and agrees to provide Drummond Group copies of or give access to any and all websites, marketing materials, communication statements, and other assertions made by OnCall regarding the ONC certification status of this product in a reasonable time to ensure the transparency and disclosures information is being accurately disclosed.

## Real World Testing Plans

"Real World Testing is an annual requirement outlined in the [ONC 21<sup>st</sup> Century Cures Act Final Rule](#) for all health IT developers participating in the ONC Health IT Certification Program. The purpose of this [Condition and Maintenance of Certification requirement](#) is for Certified Health IT Developers to demonstrate interoperability and functionality of their certified health IT in real world settings and scenarios rather than in a controlled test environment with an ONC-Authorized Testing Lab. Real World Testing verifies that deployed Certified Health IT continues to perform as intended by conducting and measuring observations of interoperability and data exchange. These observations are described in a public and transparent way through Real World Testing plans and reported as Real World Testing results."
