

## MEASUREMENT-BASED CARE

Measurement-Based Care, powered by Greenspace Health's best-in-class technology, allow you to transform care quality and unlock powerful clinical insights—directly within **your EHR**.

### DELIVER HIGHER QUALITY CARE WITH CLINICALLY-MEANINGFUL MEASUREMENT

Greenspace Health is the leading provider of Measurement-Based Care (MBC) technology, helping behavioral health organizations implement consistent evidence-based measurement (often referred to as routine patient reported outcome measures or PROMs) into their practice.

By embedding Greenspace directly into Credible and Carelogic, organizations can deliver more effective, data-informed care while meeting the growing demands of funders, regulators, and accrediting bodies.

## WHAT MBC RESEARCH SAYS

MBC has been recognized as a foundational component of high-quality, evidence-based care, with national accrediting bodies like the Joint Commission and CARF making a major push to drive its adoption, including adding MBC to their accreditation requirements. Greenspace has supported over 500 organizations cross North America, helping them successfully implement MBC:

## SEAMLESS INTEGRATION TAILORED FOR YOUR ORGANIZATION

**01**

### Streamline Workflows

Automate the entire MBC process, including assessment assignment, scheduling, and syncing client data, directly within your EHR. Free your clinicians from manual admin so they can focus on care.

**03**

### Access Real-Time Insights

Visualize client progress, monitor trends, and access actionable insights at the client, program, or organization level. Make data-informed decisions that improve outcomes.

**02**

### Enhance Client Engagement

Clients can complete assessments via SMS, email, kiosk, or QR code—no login or portal required. This ease of use drives higher completion rates and more consistent data collection.

**04**

### Configurable to Your Needs

Tailor your MBC implementation to ensure it complements your team's workflow and approach to care.

## WHY GREENSPACE + QUALIFACTS?

This partnership is built around an ongoing commitment to continually enhance the functionality of this integration, ensuring it evolves alongside the needs of our joint customers. By continually investing in new capabilities and deeper alignment between our platforms, we're empowering providers to deliver high-quality care more seamlessly, with the tools, data and insights they need to improve efficiency, strengthen outcomes, and support long-term success.

MBC embedded directly into EHR

Fully-automated workflows
