QUALIFACTS™

Qualifacts eRx

An Intuitive & Modern E-Prescribing Solution Seamlessly Integrated into Your EHR

For behavioral healthcare clinicians, medication management is a critical component of client care. Qualifacts eRx is a modern e-prescribing solution that allows providers to prescribe and manage medications for their clients. Developed in-house and integrated in the EHR, our solution is designed to simplify workflows, enhance safety, reduce errors, ensure compliance, and drive better client outcomes.

eRx Helps Providers:

Boost Productivity: Role-specific configurable workflows, automated processes, real-time data access, and a significant reduction in paperwork.

Enhance Client Safety: Minimize errors with access to comprehensive patient/client information, including current prescription, medication history, allergy alerts, drug interactions, and recommended dosage, directly within the prescription creation process.

Simplify Prescription Management: Simplify the process of sending multiple prescriptions with our efficient batching feature, and standing orders for frequently prescribed medications, saving time and reducing administrative burden.

Elevate the Client Experience: Confidently prescribe medications clients can afford with benefit checks, formulary, and medication discount options, leading to improved patient satisfaction and adherence.

Strengthen Compliance: Enhance documentation and record-keeping, ensuring adherence to regulatory requirements and simplifying audits.

Reduce medication errors by up to 39% with eRx
