

# Integrated MAT Dispensing and Medication Management

Manual dosing logs, disconnected dispensing tools, and complex regulations slow down substance use treatment programs. MethodOne simplifies Medication Assisted Treatment (MAT) workflows by integrating ordering, dispensing, inventory, documentation, and compliance with Qualifacts EHRs. By unifying the full lifecycle—from prescribing to reporting—MethodOne helps organizations improve safety, reduce compliance risk, simplify workflows, and operate MAT programs with confidence.

- **Purpose-Built for MAT:** Designed specifically for substance use treatment organizations managing controlled medications.
- **End-to-End Medication Workflow:** Order, dispense, administer, document, and report on MAT medications.
- **Integrated with Qualifacts EHRs:** Bi-directional integration ensures medication activity flows directly into client records and billing workflows.

**Simplify  
Operations**

**Improve  
Safety**

**Ensure DEA  
Compliance**

**Reduce Staff  
Burden**

**Strengthen

# Safer Care Delivery. Audit-Ready Operations.

Complete visibility and control across treatment operations—helping you manage dosing, compliance, and billing with confidence.

- Automated dispensing that simplifies daily dosing and reduce wait times.
- Barcode-based medication inventory scanning to improve accuracy and safety.
- Real-time dosing history and administration records integrated into the patient chart.
- Operational dashboards and reporting for medication utilization, inventory, and compliance oversight.
