

CCBHC EHRs

Purpose-Built to Support Certified Community Behavioral Health Clinics

CCBHCs require technology that can support complex clinical workflows, integrated care delivery, care coordination, rigorous reporting requirements, and unique payment models. Supporting more than a third of the CCBHCs nationwide, Qualifacts provides CCBHCs with comprehensive, configurable EHRs that unify clinical, billing, reporting, interoperability, and engagement capabilities to help improve care access, demonstrate outcomes, and sustain financial performance.

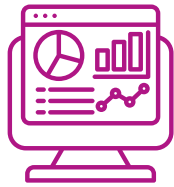

- **Purpose-Built for the CCBHC Treatment Model:** Designed to support clinical, operational, billing, and reporting requirements for CCBHC certification and ongoing success.
- **Integrated Care Delivery:** Configurable interdisciplinary treatment planning supports whole-person care with screen-and-monitor workflows and built-in clinical decision support
- **Configurable Workflows for Compliance:** Flexible forms, workflows, alerts, and reporting tools help align operations with regulatory requirements.

**Improve

**Improve
Care Quality**

Real-Time Insights. Coordinated Care. Improved Outcomes.

CCBHCs need accurate data and efficient workflows to deliver integrated care and demonstrate success. Qualifacts helps track performance, support care teams, and sustain funding.

- **Embedded dashboards and reporting tools** provide insight into metrics.
- **Integrated care tools support and connect** care teams and referrals.
- **Outcomes & Quality Measure** tracking and reporting.
- **Interoperability** through direct messaging, C-CDA exchange, and HIE integrations provide secure data exchange.
