

## Credible EHR

# Built for Behavioral Health. Proven to Scale.

Inefficient workflows and disconnected tools drain time, disrupt revenue, increase compliance risk, and take providers away from what matters most: care. Qualifacts' Credible EHR is purpose-built for behavioral health, delivering a fully integrated, configurable solution that unites clinical care, client engagement, billing, and analytics in one system—helping agencies lighten the burden for clinicians, improve outcomes, protect revenue, and scale with confidence.

- **Purpose-Built for Behavioral Health:** Designed for BH, SUD, IDD, CCBHC, residential, and integrated care workflows.
- **Fully Integrated Platform:** Clinical documentation, billing, reporting, analytics, client engagement, and AI—all connected in one end-to-end system.
- **Self-Service Configuration:** Tailor forms, workflows, alerts, and reports without costly vendor customization or long IT queues.

**Improve  
outcomes**

**Simplify  
operations**

**Ensure  
compliance**

**Maximize  
revenue**

**Reduce  
burnout**

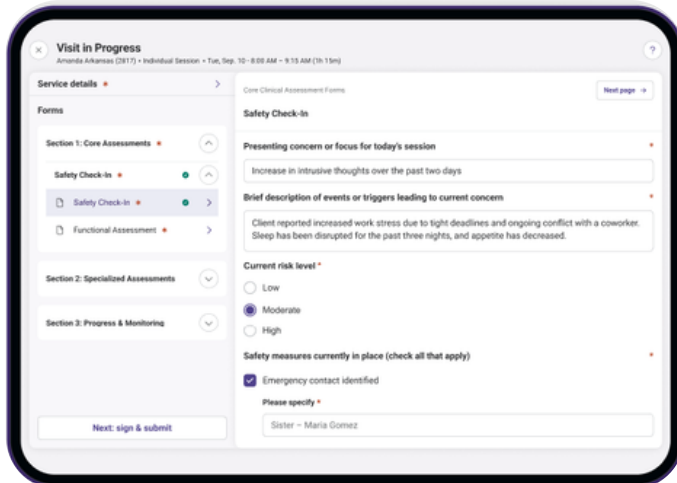

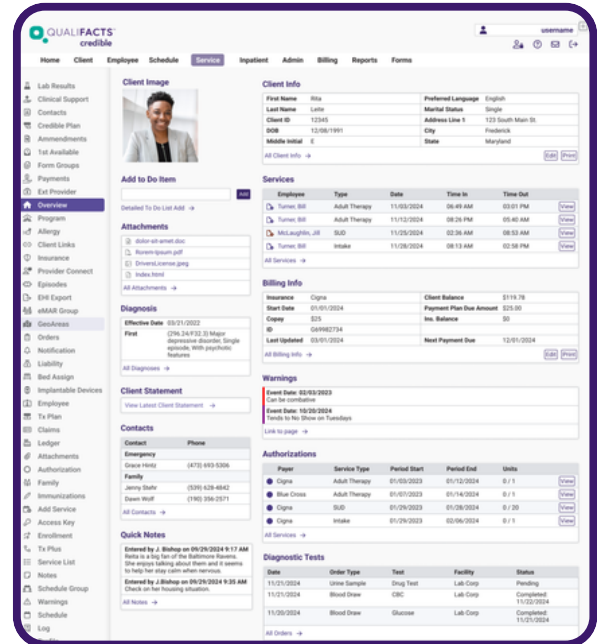

**Scale with  
confidence**

# Real-Time Insights. AI-Powered Workflows. Connected Care. Stronger Performance.

Credible provides actionable insights and full operational control across your agency.

- Integrated tools that improve outcomes.
- AI that reduces admin load and documentation work.
- Real-time insights from dashboards to guide decisions.
- RCM that reduces denials and speeds reimbursement.
- Connections to HIEs, labs, and providers for coordinated care.
